

2026 Key Nutech Hybrids

65B8V	Broadly adapted with good stress emergence; Proven performer, early RM leader
68C1V	Elite performing white cob hybrid; Steady & dependable, good staygreen and moves south
69B5V	All-around agronomic package; Strong northern movement with strong fungicide response
69C7PCE	High yield potential with wide adaptation--- Attractive fall appearance with stay green
70B4AM	Standout Performer; Versatile placement & excellent stress tolerance---well balanced agros
70F6V	Exciting top-end yield potential with improved agronomics; Excellent staygreen
71A7V	Standout Performer; Versatile placement & excellent stress tolerance-well balanced agros
72C1PCE	Broadly adapted hybrid w/ excellent versatility; Strong agronomics---consistent performance
73B2V	Yield leading genetics with solid agronomics; Performance across various soil types.
74A5PCE	Solid yield performer with excellent harvest intactness; improved health & stalks

2026 Key LG Seeds Hybrids

56C25SSP	Chart topper in early-season third party trials; Responds well to 35-38K pops & fungicide apps
58C48VT2	Tall, attractive plant type with strong emergence, nice ear flex. Caution on wet fields
62C73VT2	Versatile with excellent yield potential; High test weight with nice health & tar spot tolerance
63C32SSP	Shorter stature, new hybrid with strong yield and good stress tolerance
63C82VT2	Maximize yields at medium-high pops; Recommend fungicide for improved late season health
64C43VT2	Full-season yield champion with excellent emergence. Versatile placement, average disease
66C44VT2	Elite yield with proven performance; Best offering in VT2, responds to high mgt.
67C27STX	Full-season SSTX yield Leader; Tremendous grain quality with average plant health
